

Barry,

Great visiting with you again. I would certainly agree to provide a letter to you and NELCO that expresses my gratitude for the first class treatment that you have provided to me, my clients and my research projects over the many years that I have known you. Through your help, NELCO has graciously provided lead for the NCRP 49 Rewrite Project and for my transmission measurements made at your plant. Also because of your efforts, one of NELCO's figures will be displayed and referenced in the new NCRP shielding Report that will be published soon. All my previous experiences with NELCO have been very positive and I would recommend NELCO as a viable source for diagnostic shielding products and services. The project team of NELCO, who I have dealt with, respond in a professional and timely manner and NELCO offers quality shielding products. Many thanks for your continued support!
